

Monomaterial FFS-Packaging - What is new?

Informationen

Beschreibung: Sealing and processing mono-material packaging is no trivial matter. We talk about optimised mono-material films for FFS processes. We explain why a temperature gradient between the outer and inner layer is necessary, how MDO technology has made progress possible here and what mechanical engineering can do to support mono-material welding.

Zielgruppe: Everyone who is involved in the packaging of flexible packaging is cordially invited

Niveau: **Stufe 3** - Vorkenntnisse sind sinnvoll

Weitere Informationen: Dauer: 1:15h
