PFAS - the so-called "Forever Chemicals" - What do I have to consider?
Informationen

Beschreibung:	So-called perfluorinated alkyl substances (PFAS), also known as "forever chemicals," are experiencing increasing international concern and are being restricted or banned completely in more and more countries. In addition to their toxicological significance, authorities are particularly concerned that these substances degrade extremely slowly in the environment. As a result, there is concern that PFASs released into the environment today will continue to pollute generations after us.
Zielgruppe:	All those involved in product safety for packaging, e.g. employees from laboratory, production, development
Niveau:	**Stufe 2** - Previous knowledge is helpful, but not required
Weitere Informationen:	duration: 1:00h One video One download
