3rd European Stand-up Pouch Conference - Focus: Innovation (German-English simultaneous translation)

Agenda day 1 Tuesday, 16.10.2012

8:45	Registration and breakfast buffet
9:30	Welcome and introduction
9:45	Jörg Schönwald *SCHÖNWALD CONSULTING* **The stand-up pouch in competition with the PET bottle and beverage carton** • The position of the stand-up pouch in the packaging market • Comments on PET bottle and beverage carton • Strength and weaknesses • - An economic comparison
10:25	Michael Benner *KIN GmbH* **Background information about preservation by means of sterilisation and aseptic filling** • Basics of the common sterilisation procedures for beverages • Characteristics of an aseptic preservation • Comparison of methods regarding their efficiency
11:05	Coffee Break
11:45	Peter Müller *Robert Bosch GmbH* **Efficient FFS pouches production and filling** • Typical products in FFS pouches from clean to aseptic • - Advantages of the Bosch system, product safety and different kinds of tubular pouches • - Sustainability • - Practical examples and future prospects
12:25	Eduard Aguirre *Volpak Packaging Machines* **Innovating pouch packaging technology**
13:05	Lunch
14:15	Gerald Herrmann *uv-technik meyer gmbh* **Sterilization of packaging materials by irradiation with ultraviolet light** • How does UV cleaning works? • Intensity of the cleaning effect compared to chemical procedures • Stumbling blocks and solutions in practice
14:55	Klaus Liedtke *Daytona Systems LLC* **High-speed filling with and without spouts** • What means high speed? • How to realise high speed? • Benefits of high speed filling
15:35	Coffee break
16:10	Andreas Heimsoth *Thom Metall-u. Maschinenbau GmbH* **New generation pouches filling technik** • Success factors in introducing new packaging material, from a technical point of view • From practice for practice: what everybody knows, but left ignored again and again
16:50	Yuta Kato *Sojitz Solvadis GmbH* **High barrier films as basis for new applications in the pouch** • New barrier layers offer new markets • OTR < 0,1 cm^3/m^2xdx day • Product examples and idea
17:30	Conclusion of the first day
19:30	Dinner at Andechser

3rd European Stand-up Pouch Conference - Focus: Innovation (German-English simultaneous translation)

Agenda day 2 Wednesday, 17.10.2012

8:15	Breakfast buffet
9:00	Achim Bauder *Harro Höfliger Verpackungsmaschinen GmbH* **Pouch-making 100% in ultrasonic operation** • Differences to the heat contact sealing (?) and resulting advantages • Can the sealing procedure with ultrasonic be transferred to the spout?
9:40	Andrea I. Lazzara *SWISS Filling and Packaging AG* **From the film via the pouch up to the filled product** • Reasons for the combination of film, pouch and filling know-how • The customer' s advantage of optimised systems from the technical view • Examples of system solutions from all over the world
10:20	Coffee break
10:40	Massimo Manfredi *FENCO Food Engineering Co.* Sandro De Marco *FENCO Food Engineering Co.* **Process equipment for aseptic and hot stand-up pouch filling** • What is needed for aseptic pouch filling? • What is needed for Hot filling? • Main differences between the two systems! • Examples and ideas for new products in pouches!
11:20	Arnaud Quetin *Pro Aseptic Technologies* **From film up to the final ASEPTIC spouted pouch in the dairy industry** • Clean films for clean pouches • Aseptic for dairy products
12:00	Lunch
13:20	Ken Wilkes *Smart Bottle Inc.* **First commercial launch of Smart Bottle for food products** • Benefits of Smart Bottle • Kraft' s commercialization story • Future applications
14:00	Harald Saelens *Scaldopack SPRL* **Scaldopack - A pouch which cools and heats the contents** • The principle of the cooling and heating pouch • Technology for the production and filling • Application examples and ideas
14:40	Karsten Schröder *Innoform Coaching GmbH* **Summary** • Key messages of the speakers
15:00	End of the conference
