Blown film extrusion and film properties
Informationen

Beschreibung:	For all who would like to know more about blown film extrusion in theory and mainly in practice we offer a course at the pilot plant and laboratory of Intertek Polychemlab which is particularly suitable for machine operators, business people who would like to gain practical experience and executives of other divisions. At first we will discuss about machine technology and raw materials like PE and PP in theory. Effects caused by adjustments of facilities will be visualized and afterwards demonstrated and tested at the pilot plant. The technical expertises of the production will be correlated with laboratory values at the next day. Test methods will be simulated, the results interpreted and measurements demonstrated. Tricks will be emphasized.
Niveau:	**Stufe 1** - keine Vorkenntnisse erforderlich
Veranstaltungscode:	**BE-06-08**
Zeiten und Ort:	Dienstag, 10. Juni 2008 Geleen
