

Opportunities and limits of barrier films and laminates

Information

Description: Recycling is booming! Everyone wants barriers and mono-material packaging at the same time. But is this the right way to go? In this talk we discuss the sense and nonsense of barrier films. Composite films play a dominant role and how they are optimised. We also take a look at disposal and recycling. How must barrier packaging change - we offer approaches and solutions.

Target group: Decision-makers along the label and flexpack supply chain and anyone who wants to find more out about flexible packaging in terms of content.

Level: **Level 3** - Previous knowledge is useful
