The world of polyethylenes - Which PE for which purpose?
Information

Description:	Polyethylene is the mass plastic par excellence in the packaging world. The variety of raw materials is enormous and therefore confusing. In this web seminar, you will get to know the main groups better, be able to derive properties from basic structures and make a preselection. Whether LDPE, HDPE, LLDPE or Metallocene-PE - you will be able to categorise all common types and draw expert conclusions. The most important characteristic values are presented and the raw material groups compared. Beginners in the field of extrusion, QA and production in particular will benefit from practical information across the world of polyolefins.
Target group:	Employees from production, development, technology, construction, QA, but also purchasing and sales.
Level:	**Level 2** - Previous knowledge is helpful, but not required
Further information:	duration: 2:00h
Event code:	**EXdE-03-27**
Times:	Thursday, 25. March 2027, **10:00** - **12:00** o'clock
Event price:	**179,00€ net** (plus 34,01€ VAT)
